About

I'm passionate about technology, with a strong knowledge of Javascript, HTML, CSS, and JQuery. I have web development experience applying Clean Architecture using React, NodeJS, and API consumption. Currently, I've been working at Senai, a renowned Brazilian education company, developing SCORMs for Learning Management Systems. I'm contributing to web accessibility at the organization Web Para Todos (Web to Everyone). Also, I've been working voluntarily at Prototipando a Quebrada (Prototyping the Hood) as a mentor.

Career

Pleno Web Developer
SENAI | Jun 2021 - Currently

The task in this experience is developing learning distance courses using HTML, CSS, JQuery, and Javascript, JSON packing as a SCORM to run in LMSs, and saving at GitLab. I used to develop recourses like sliders, interactive exercises, audio players, and others. We already adapted our code to use React as a framework. We use Agile Methodology, doing sprints, using Trello (Kanban).

Junior Developer
NTT Data | Jan 2021 - May 2021

As a Junior Developer, I got experience analyzing databases and developing solutions using PL/SQL, ShellScript, and Java. So I could offer proper resolutions to complex client problems in level 3 support. Working with teamwork, I helped to automate and document processes, contributing to improving support services.

Education

Conversational English
Times Idiomas | Jan 2022 - Jun 2023

Information Technology Management.
Uniasselvi | Aug 2018 - Jan 2021

Systems Development
IFSC | Aug 2019 - Apr 2021

Ongoing learning

Voluntary work
PAQ | Jan 2025 - Currently

I've been working voluntarily at *Prototipando a Quebrada* (Prototyping the Hood) organization, as a mentor for a young student starting her studies in Information Technology.

Voluntary work
Web Para Todos | 2022 - Currently

I regularly volunteer for the *Web Para Todos* (Web to Everyone) movement and, through this, actively contribute to transforming the Brazilian web into a much fairer, inclusive, and accessible environment for all.
